-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Applicant's election without traverse of group 1, claims 1-7 and 16-19, in the reply filed on 03/29/07 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7 and 16-19 are rejected under 35 U.S.C. 102(anticipated) as being anticipated by Walker et al (US 7,033,276 B2).

As per claims 1 and 16, Walker discloses a gaming network comprising: a player processing system structured to record data about a player (see figs. 1, 2, 4); a gaming device coupled to the player tracking system and structured to configure a present state of an award based on the recorded data (see figs. 1, 2, 4; slot machine 110 coupled to network server which includes a player preference tracking number).

As per claims 2-4, Walker discloses a gaming network wherein the award is capable of having an initial state and one or more non-initial states; wherein the game is structured to configure a state of the award to one of the non-initial states; and wherein the game is structured to configure a state of the award for the player to one of the non-initial states in a present gaming

session if the award was in one of the non-initial states in a previous gaming session of the player as claimed (see figs. 1-6).

As per claims 5, 17 and 18, Walker discloses a gaming network further comprising a message controller resident on the gaming device and a messaging center in the player processing system (see fig. 1, col. 5, lines 55-65).

As per claim 7, the gaming network as taught by Walker is capable of communicating using XML messaging as claimed.

As per claim 19, Walker discloses a gaming network wherein the gaming device is structured to communicate to the player tracking system over a first communication network, and wherein the gaming device is structured to communicate to the player server over a second communication network (see fig. 1).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Bartholomew (US 2007/0117616 A1) discloses a method and apparatus for awarding individual or group point multiplication.
- Block et al (US 2004/0185936 A1) disclose a method and apparatus in a gaming network for transmitting event messages from gaming terminals to a central server and, consequently, routing each event message to an appropriate application.
- Walker et al (US 2005/0014554 A1) discloses a multiplayer gaming device and methods.
